

CASE STUDY
DISTRICT-WIDE LED UPGRADE W/ 0% CEC LOAN

Vector Energy Group won a SPURR Master Contract (SMC) as a Turnkey Provider, standing out by their ability to keep project costs low due to a relationship with the California Conservation Corps. This SMC was awarded through a fully competitive RFP process evaluating price, quality, and overall value. Vector Energy Group has experience with both municipal and K-12 clients and has successfully completed SPURR projects using on-bill financing (OBF) and successful grant writing.

Golden Plains Unified School District
6 sites - completed 2021

Golden Plains Unified School District engaged with Vector Energy to assess 6 sites for energy savings. With no funding in place, Vector’s full turnkey approach included securing a 0% loan from the California Energy Commission to fund the project.

The process was streamlined and easy from the get-go, the only hiccup we had was due to the Covid-19 pandemic that extended the project longer than expected. Vector brought to us the opportunity to apply for a 0% loan with the Energy Commission: They took care of the extensive paperwork and submitted an application on our behalf. This was a competitive loan and our application won!

– Anthony Hernandez; Chief Business Officer

Key Benefits

CEC 0% Loan

Project selected to receive 0% loan through a competitive process based on overall energy savings

CCC Partnership

Using California Conservation Corps (CCC) labor provides valuable experience to young Californians and controls labor costs

Energy Reduction

698,900 kWh per year reduced consumption

Maintenance & Cost Savings
